

Lucidity Australia's new & Innovative GloTrac LED lights will provide unique styling and improved safety for your Caravan.

May 2014
Australia

STARTS

Lucidity Australia, the leading LED lighting manufacturer for caravans, truck, trailer and busses in Australia, is proud to announce the release of its GloTrac lighting series for Caravans.

GloTrac's design significantly increases the tail lamp illumination area, which increases on-road visibility for your caravan when travelling at night.

As a caravan owner you no longer need to spend a fortune to upgrade your asset and improve the visibility of your caravan for your next holiday. The Lucidity GloTrac series offer high quality products, excellent performance and are competitively priced.

Compared to conventional design, the GloTrac tail lamp's surface area has twice the illumination surface as a conventional LED light. While increasing tail lighting surface area, it offers uniform, non-spot design. It is softer to the eyes, especially for the vehicle travelling behind your caravan.

GloTrac series, also utilize the latest LED SMD technology (Surface Mount Design), which optimises the performance of LED based products. The slim-line, easy to fit DIY design means that anyone can install the lights with a minimum of effort.

Lucidity Australia also offers a wide range of quality interior lamps. As all our LED lights are manufactured in-house, Lucidity LED interior lights can offer you the best consistent LED colour and temperature for your caravan. Meaning mismatched interior LED coloured lights in your caravan living area are a thing of the past.

All Lucidity LED lights offer superior quality, and are backed with five years manufacturer warranty. Using quality materials like polycarbonate provides superior protection and minimises the risk of lens damage. All electronics are fully sealed, making them suitable to use throughout your entire caravan.

Consider Lucidity's GloTrac and LED range for your caravan, so you and your family can have a safe and enjoyable holiday. The GloTrac series are available now in Australia.
